## PRICE AND VARIETY LIST

# SMITH BROTHERS NURSERIES

CENTERVILLE, UTAH

Plant at Centerville, Utah—Phone Bountiful 167-R2

Plant at Murray, Utah—Phone Murray 531-R3

Quotations and conditions in this list are in effect so long as stock on hand is unsold. All orders will read cash on delivery. Cash or satisfactory reference from all parties unknown to us. Free delivery to all local points. We do not prepay freight nor express unless otherwise agreed. All stock leaving our packing grounds will be selected and packed in the best possible manner. So many factors enter into the success or failure of nursery stock after moving from under our care that we cannot assume losses through causes over which we have no control. WE DO NOT REPLACE. Any just claim for error or damaged stock will receive our strict attention.

"By Their Fruits Ye Shall Know Them"

The following quotations apply to the entire list of Fruit Trees. Write us for prices on light grades; also on quantities in Peach and Apricot.

### 50 Trees at 100 Rates

	Each	Lots of 10	Lots of 100

Zinfandel Grapes, black .....	.25	.20	.15

At last we have located the very thing we have been looking for—a real tree protector—an inexpensive product. Made from the fiber wood, Yucca, can be placed on the young tree in a moment and will stand weather, winter and summer for several seasons. It protects your trees (the body) from rabbits, rats and mice, also from peach borers and other insects. It is a protection against hot sun and blistering winds in summer and sun scald in winter. It is being used now in the west and northwest by the millions. We carry a stock of these protectors. Same can be furnished, 18-inch (wired) at 2½ cents each.

This protector should be placed on the tree the day it is planted. Send to us for a sample.

## ORNAMENTAL TREES

	Each	Per 100
Carolina Poplar, 12 to 14 ft.	\$ .75	\$50.00
Carolina Poplar, 10 to 12 ft.	.50	35.00
Carolina Poplar, 7 to 8 ft.	.25	20.00
Black Locust, 8 to 10 ft.	.50	35.00
Pink Locust, 8 to 10 ft.	1.50	
Norway Maple, 10 to 12 ft.	1.50	
Norway Maple, 8 to 10 ft.	1.25	
Sycamore, 6 to 8 ft.	1.25	
Cut Leaf Birch, 6 to 8 ft.	2.00	
European Mountain Ash, 8 to 10 ft.	1.50	
Paul's Scarlet Thorn, 5 to 6 ft.	2.00	
Globe Locust No. 1, 7 to 8 ft.	3.00	
Globe Locust No. 2, 7 to 8 ft.	2.50	
Globe Locust No. 3, 7 to 8 ft.	1.50	
Chinese Elm, 8 to 10 ft.	1.50	
Chinese Elm, 7 to 8 ft.	1.00	
Chinese Elm, 6 to 7 ft.	.75	

## PRIVET

Hedge, 2 year, heavy	\$ .05
Plant 6 inches apart	

## CLIMBING VINES

50 Cents Each

- Boston Ivy, clings to the wall
- Engleman Creeper, clings to the wall
- Virginia Creeper
- Trumpet Vine
- Clematis, Jackmani, Purple
- Clematis, paniculata, late white
- Halls Japan Honeysuckle
- Wisteria, American
- Euonymus, Radicans, Evergreen

## ORNAMENTAL SHRUBS

Low growing shrubs will be designated by one asterisk (\*), high growing shrubs with two asterisks (\*\*). This checking will enable the planter to place the plant in the proper position in the group. Wherever space will admit two rows of shrubs should be planted, the high growing plants always in the rear, the low growing kinds planted in the foreground in a staggered form. In planting do not put manure or fertilizer of any kind in the hole with the roots—this will apply to all plantings.

Your choice of any or all of the following 2 and 3 year shrubs at **50 cents each, or \$4.00 per dozen.**

- \*\* Spirea, Van Houtti, Bridle Wreath
- \*\* Spirea, Sorbifolia
- \*\* Spirea, Sorbaria, aitchisoni
- \*\* Spirea, Aurea, Golden Spirea
- \* Spirea, Anthony Waterer
- \* Spirea, Frobella
- \* Spirea, Thunberg
- \* Red Jap Barbary
- \* Jap Barbary
- \*\* Persian Lilac
- \*\* Japanese Quince
- \*\* Forsythia, Golden Bell
- \*\* Cutleaf Sumac
- \*\* Smooth Sumac
- \*\* Golden America Elder
- \*\* Bloodtwig Dogwood
- \*\* Weigelia, Eva Rathke
- \*\* Common Purple Lilac
- \*\* Snowball
- \*\* Pink Almond, Flowering
- \*\* White Almond, Flowering
- \*\* Prunis Passardi, Purple
- \*\* Tamarix, Hispida
- \*\* Althea, Single and Double
- \*\* Cotoneaster, Peking
- \*\* Tartarian Honeysuckle
- \*\* Rose Acasia
- \*\* Butterfly Bush, Buddleia
- \*\* Siberian Pea Tree
- \*\* Dentatum, Arrowwood
- \*\* Calycanthus, Sweet Shrub

## ROSES

50 Cents Each, \$4.00 per Dozen

The following list of roses is made up from the choicest varieties grown in the world. These plants must not be classed with stock sold by department stores and cheap distributors. They are all number one plants and have bloomed one year. Cheap plants are dear at any price.

Etoil de Holland, red  
Red Radiance, red  
Gruss an Teplitz, red  
Dame Edith Helen, pink  
Radiance, pink  
Claudis Pernet, yellow  
Golden Ophelia, yellow  
Padra, Copper  
Mrs. Ed. Herriott, copper  
Los Angeles, salmon pink  
Frau Carl Druschki, white  
Paul Scarlet, red climber  
American Beauty Climber  
American Pillar, Apple Blossom Climber  
Talisman, golden copper

## PLANTING ROSES

Roses by nature are rather delicate and sensitive, and should receive special attention at time of planting. Soil should be put in the very best condition possible, only old well rotted fertilizer should be used, see to it that no coarse material of any kind such as manure or other organic matter comes in contact with the roots, this spells failure and often death to the plant. Ever blooming varieties are tender and must be cared for during the winter season. It is good practice to plant deep enough to be sure that a good part of the plant is under the surface, and a further protection against freezing is to heap the soil about the plant just before the freezing weather begins in the fall. Remove this soil in the spring and cut the plant back to about 8, 10 or 12 inches. This cutting back should be done at time of planting also. Fertilizing should be done by placing the matter on the surface rather than under ground, thus feeding the roots with liquid plant food properties. Water plants well at time of planting, then a consistant moisture should be maintained during the season. Plant only the best and give it the best care and attention, pleasing results will follow.

## PERENIALS

	Price Each
Tritoma, Red Hot Poker .....	\$ .25
Hibiscus .....	.25
Peonies, Heavy Plants .....	.50

## EVERGREENS AND SHRUBS

The following list comprises some of the finest varieties adapted to our climate. Evergreens are now being used extensively in mass and foundation plantings. Our line this season is so varied in kind, character and size that we are unable to quote prices here. Kindly see us or write us concerning this. We have a beautiful stock to offer you.

T. Orientalis—"Berckman's Dwarf Ever-golden Arborvitae."  
Orientalis—Chinese Arborvita, the hardiest of the Arborvitae.  
Thuya—Bakers Arborvita, one of the fast growing shapely Arborvita.

Thuya—Beverlyinches Arborvita, a golden column Evergreen.  
Incense Cedar—A beautiful tree, a native of northern California.

Thuya Bonita—Identical with Berckman's Golden, but green color.

Austrian Pine—one of the heavy growing conifers.

Virginiana—Eastern Red Cedar.

Colorado Blue Spruce—Possibly the universal favorite Spruce.

Pfitzers Juniper—The best of all the prostrate Junipers, used extensively for foundation planting.

Chinese Juniper—One of the compact silver tipped Junipers.

Mahonia—Oregon Grape.

Pyracantha—Lalandi, orange colored berries.

### TAKE NOTICE—THIS STOCK IS PERISHABLE

We have used every intelligent method known to us in growing this stock, also in conserving energy and vitality. Its success will depend largely upon the care it receives in the immediate future.

#### Your Responsibility Begins Now

Be sure that the roots of all trees and plants are protected from sun and wind. Roots should never be allowed to get dry for a moment, but should be kept in a wet or moist condition until planted.

Be sure that ground is in the best condition possible. Dig hole large enough to admit the root system with plenty of room for a healthy development.

Be sure that no manure, ruffage or organic matter goes into the hole with the roots. Apply it on top of the ground after planting.

Be sure to water every tree or plant immediately after planting, **this is extremely important**, as the water settles the soil about the roots and assists nature a once in her work or rehabilitation. **Do not neglect this.**

Be sure to prune all fruit trees back to a proper height and shape as soon after planting as possible, in doing so, the draft upon the reserve energy is reduced to the minimum. Fruit trees should be cut back to 22 or 24 inches from the ground, retaining side branches. The points of all roots should also be freshened, or cut back slightly.

The above practise is applied in dealing with ornamental trees and shrubs, with the exception of pruning which must be done in keeping with the habits and characteristics of kinds and varieties too numerous to treat here. If information is desired, make inquiry.

All experienced planters appreciate the above facts.

The printing of these suggestions is inspired by the interest we have in the success of our valued patrons and friends.
